

36" ROTARY BROOM

**MULTI-SEASON VERSATILITY.
SIMPLE MAINTENANCE.
COMMERCIAL DURABILITY.**

Whether gathering clippings, dethatching, or removing snow and ice, the Exmark® Rotary Broom provides true four-season versatility. It's an essential tool for landscape pros—or anyone with a large property to maintain. And, because it's an Exmark, you can be assured that it will provide years of reliable service.

FEATURES:

- Equipped with a Kohler® CH270 Command PRO® engine. Engine functions as a multi-season engine as the air intake rotates 180°.
- Brush design minimizes impact and surface damage while cleaning more effectively.
- Proven commercial variable speed shift-on-the-fly transmission features six-positions forward and two-positions reverse.
- Broom Angle is 40-degrees total. 20-degrees to both the left and right.
- 36-inch broom width which is perfect for cleaning up clippings, dethatching, snow and ice removal, and more.

SIMPLE HEIGHT ADJUST

The broom height can be fine tuned quickly and easily in 1/8-inch increments by simply moving two pins. This makes leveling essentially foolproof, and allows for precise surface engagement.

DESIGNED FOR DURABILITY

You can adjust the commercial-grade Kohler Command Pro engine for multi-season use by simply rotating the air intake. Six forward and two reverse positions mean you can handle any job efficiently and effectively.

USER-FRIENDLY CONTROLS

Independent control levers engage the broom and drive systems separately. That means you only sweep what needs sweeping. Adjust the broom angle 40 degrees with a simple thumb latch.

The mowers landscape professionals trust 2 to 1.*
